Gama Aviation Signature Adds Two New HondaJets to Fleet

SHELTON, CT – August 21, 2018 – Gama Aviation Signature, the world’s premier aircraft management and charter company, announced today the addition of two HondaJet aircraft to their ever-growing fleet.

“Our managed fleet has been growing exponentially in the large cabin category over the past few years, but so has the charter demand for more efficient solutions for regional trips,” says Tom Connelly, CEO of Gama Aviation Signature. “The HondaJet will fit this demand and complement our fleet nicely.” “When Honda Aircraft Company made the decision to put several aircraft into 135 service to build their brand loyalty and increase the public access to the HondaJet, they chose Gama Aviation Signature to be their partner for the operational excellence, safety culture, and their nationwide network of support.”

Honda Aircraft Company president and CEO Michimasa Fujino added, “We are proud Gama Aviation Signature has added two HondaJets to its fleet and believe the aircraft will surpass their customers’ expectations. As the largest aircraft management company in the United States, Gama Aviation Signature has a reputation for providing unrivaled support for their aircraft and I am confident the HondaJet will offer their customers an incredible charter experience with its high performance, efficiency and comfortable cabin.”

The HondaJet is the fastest, highest-flying, quietest, most fuel-efficient, and most comfortable business jet in its class, making it ideal for travelers seeking a luxurious option for regional excursions. The cabin measures 17.8 feet long by 5 feet wide by 4.83 feet in height and can comfortably seat 5 passengers. Gama’s HondaJets will initially be based in Teterboro and Chicago offering an effective solution to the typical gridlock commuter’s experience each day, as well as a unique experience for those longing for nearby getaways like Nantucket and Martha’s Vineyard.
